

WHAT WE DO

Special Economic Zones (SEZs) are typically designated areas within a country that have different economic regulations and policies compared to the rest of the country

These zones are often created to attract both:

LOCAL AND
FOREIGN
INVESTMENT

PROMOTE
ECONOMIC
DEVELOPMENT

FACILITATE
TRADE

The specifics of each SEZ can vary depending on the goals and policies of the country in which they are established.

The Atlantis Special Economic Zone (ASEZ) is located in the Western Cape, a mere

40 KM

away from the city of Cape Town.

It exists to assist green technology manufacturers to become globally competitive through integration into a broader industrial ecosystem. The only one of its kind in Africa, the ASEZ aims to become Africa's leading, globally competitive and export-oriented greentech manufacturing zone.

Offering
renewable
energy

Competitive
lease rates

a skilled
labour
pool

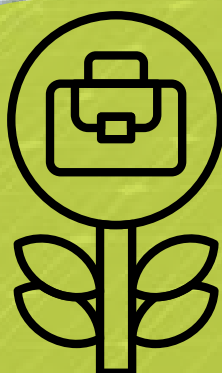

world class
infrastructure

The Atlantis SEZ offers serviced sites with access to well established road networks, linking you to global markets through established trade ports.

The zone is fully operational and houses several green technology investors. These existing companies represent a healthy cross-section of the green economy.

Driving growth through green economy innovation and sustainable job opportunities remains at the heart of what the Atlantis Special Economic Zone Company does.

These principles will contribute towards growing the regional economy in an impactful way and enabling the regeneration of Atlantis to become a leader in the growing green economy.
